8.11 Debt relief committed under HIPC and MDRI initiatives[b]							
Debt relief committed under the HIPC initiative (cumulative)	36	90					G
Debt relief delivered in full under MDRI (cumulative)	32	80					G

Abbreviations: CFCs, chlorofluorocarbons; GDP, gross domestic product; ODP, ozone depletion potential; PPP, purchasing power potential; OECD, Organization for Economic Cooperation and Development; DAC, Development Assistance Committee; ODA, official development assistance; HIPC, heavily indebted poor countries; MDRI, Multilateral Debt Relief Initiative.

[a] The coding of the nature of the data is as follows:
C = country data. The figure is the one produced and disseminated by the country (including data adjusted by the country to meet international standards).
CA = country adjusted. The figure is the one produced and provided by the country, but adjusted by the international agency for international comparability — that is to comply with internationally agreed standards, definitions and classifications (age group, International Standard Classification of Education, etc.).
E = estimated. The figure is estimated by the international agency, when corresponding country data on a specific year or set of years are not available, or when multiple sources exist, or there are issues of data quality. Estimates are based on national data, such as surveys or administrative records, or other sources but on the same variable being estimated.
M = modelled. The figure is modelled by the agency when there is a complete lack of data on the variable being estimated. The model is based on a set of covariates — other variables for which data are available and that can explain the phenomenon.
G = global monitoring data. The figure is regularly produced by the designated agency for the global monitoring, based on country data. However, there is no corresponding figure at the country level, because the indicator is defined for international monitoring only (example: population below $1 a day).
NA = not available. The nature of the data is unknown or was not provided.

[b] Data on the cumulative debt relief committed are updated every year.
